Art Unit 222

U 1. Claims 2-6 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

U Claims 2-6 recite further functional limitations to parent claim 1. However, it is not clear which individual structural elements in claim 1 are being further limited.

C 2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

"A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States."

C 3. Claims 1-6 are rejected under 35 U.S.C. § 102 (b) as being anticipated by Fishbein et al..

Figure 9 of Fishbein et al discloses a continuous wave radar comprising: an RF generator (47); a modulator (49); a transmitting antenna (54); a receiving antenna (54); a receiver (56); a correlator (61); code delay means (66); and processing means (86).

C 4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The references cited show background art.
